

Campaign Paintball Safety Guidelines

Experience

Campaign was founded in 1987 and has built an excellent reputation for quality entertainment and regard for the health and safety of participants. Campaign is a member of the United Kingdom Paintball Sports Federation, the sports Governing body. Campaign Director Niall Squire has been an Executive Committee Member of the federation for the last three years and fellow Director James Sennett has worked within the paintball industry for over 20 years.

Location and Amenities

Campaign is situated in Old Lane, Cobham, It has large woodland playing areas which are free from potential hazards and clear of public rights of way. Centrally situated is the Safe Zone, this enclosed area is surrounded by 3 metre high pellet proof netting and paint markers are always kept outside this area, so participants can safely walk around within without wearing their safety equipment. Situated within the safe zone are the central administration office, Stores, First Aid, Toilets, changing and kitchen, where food is prepared in compliance with Environmental Health guidelines.

Staff

All games take place within daylight hours, and are marshalled by fully trained site personnel on a ratio of approximately one marshal to fifteen players. The marshals are clearly visible in site uniform and at each event there is at least one marshal with Red Cross/St Johns Ambulance First Aid Training.

Briefing

Prior to the commencement of games a comprehensive introduction and safety briefing is given to all participants. This includes instruction on the safe use of all equipment with important emphasis on eye and ear protection, (goggle cleaning & adjustment procedures etc.) the rules of the game, a description of the geography of the site and an introduction to the site staff.

Equipment

The equipment provided to participants is of the highest standards. All players are given goggles with integral face & ear protection. All equipment is checked and serviced weekly.

All paintball markers are chronographed regularly and set at approximately 270 feet per second. The kinetic energy of the paintballs will not exceed 12 ft pounds. The contents of the paintballs are non-toxic, biodegradable and non-irritant.

Insurance & Risk assessment

If you have any other concerns with safety, please do not hesitate to call us. A copy of our Employers/Public Liability Insurance Certificate and Risk Assessment is available for inspection on request.
